Forum Discussion: How can we strengthen women economic empowerment (WEE) in Greater Toledo?

The Women's Empowerment Principles can offer practical guidance to business and the private sector on how to empower women in the workplace, marketplace, and community. Developed through a partnership between UN Women and the United Nations Global Compact, the Principles are designed to support companies in reviewing existing policies and practices—or establishing new ones—to realize women's empowerment. These principles help strengthen WEE.

In addition, learn how the Greater Toledo Area's Global Champions and partners' new initiatives project – The Hub, can provide VISIBILITY, which are the most powerful tools for educating and empowering the community about all the amazing options that exist in the Greater Toledo area. This initiative can help women's groups learn what others are doing and develop ways to build strength through numbers, reduce duplication, and achieve more success via collaboration. Greater Toledo is up to a lot of greatness. If we collaborate and work together, we can help make it an even better place to work, live, learn, mentor and raise the next generation with strong economic empowerment.
